

# Omni Measurement & Graticule App

AP 100-001

## Features

**Point to point, diameter, angle, adjustable X-Y grid, shapes and annotation** to accommodate a multitude of samples specifications

**Snap to edge** detection capability ensures repeatable and reproducible measurements thus reducing variability between users

Calibrated to ISO 17025 standard, providing **trust** and **confidence in measurement** values

**Maintains calibration while zooming**, so no need to waste time performing recalibrations between changing magnifications

**Graticule** creation allows samples to be analysed against on-screen digital templates with set tolerance limits

Enables quick **go/no-go** defect analysis

Improves **efficiency** in high-volume sample through-put inspection
